

**INTERCONNECTION AGREEMENT FOR NET METERING OF  
RENEWABLE ENERGY GENERATING FACILITIES**

Name \_\_\_\_\_

Address \_\_\_\_\_

City, State & Zip \_\_\_\_\_

Phone \_\_\_\_\_

E-Mail \_\_\_\_\_

District's Customer Account No. \_\_\_\_\_

Location No. \_\_\_\_\_

Meter No. \_\_\_\_\_

Customer Name (hereinafter called "Customer-Generator") and Overton Power District No. 5 (hereinafter called "District") enter into this Interconnection Agreement ("Agreement") for Net Metering of Renewable Energy Generating Facilities (hereinafter called "Facilities"). In this Agreement the Customer-Generator and the District may be individually referred to as "Party" or collectively as "Parties."

The Customer-Generator may install total combined generation equal to their highest monthly usage (within the last 12 months) and not more than 10 kW for residential and small commercial, for large commercial the limit is 25 kW. This Agreement applies to the Customer-Generator's Facilities identified herein with the specified characteristics and generating capacity. This Agreement does not allow interconnection or operation of facilities different than those described herein.

The Parties hereto agree as follows:

**1. PURPOSE OF INTERCONNECTION AND REPRESENTATIONS**

The purpose of this Agreement is to allow the Customer-Generator to install Facilities equal to their highest monthly usage (within the last 12 months) and not more than 10 kW for residential and small commercial, for large commercial the limit is 25 kW in parallel with the District's distribution system. The Facilities are intended primarily to offset part or all of the Customer-Generator's own Electrical requirements.

**2. DESCRIPTION OF CUSTOMER-GENERATOR’S RENEWABLE ENERGY GENERATING FACILITIES**

Type of Generator (Wind, Solar or Other)	Generator Output Rating (kW)	Inverter Mfr. And Model	Inverter Rating (Watts)	Inverter Output Voltage	Phasing Single or Three Phase
Solar					
Other					
Wind					

The District requires the Customer-Generator to provide Facilities consisting of a minimum of a generator, an inverter, a disconnect switch, wiring and connections. The Facilities to be interconnected are generally described on the following page:

The rating of the Facility shall be determined by the efficiency of the generating system, the inverter output rating and the voltage.

Site Address: \_\_\_\_\_

Facilities will be ready for operation on or about: \_\_\_\_\_  
Date

**3. INTERCONNECTION REQUIREMENTS**

- 3.1 The Customer-Generator and the District shall be subject to the terms, conditions and requirements of the District’s Net Metering Policy. The District’s Net Metering Policy is made a part of this Agreement and is contained in “Attachment C” of this Agreement.
- 3.2 The Customer-Generator shall deliver the available energy to the District’s meter.
- 3.3 The Customer-Generator shall install metering facilities in accordance with the District’s requirements.
- 3.4 The Customer-Generator shall install a manual disconnect switch within three feet of the District meter that isolates the Facilities from the District distribution system. The disconnect switch is to be installed between the meter and the Facilities.

- 3.5 The Customer-Generator shall not interconnect its Facilities with the District distribution system until the following conditions have been satisfied:
- 3.5.1 Provide to the District a copy of the Customer-Generator's final inspection clearance from the governmental authority (hereafter referring to the City of Mesquite or Clark County) having jurisdiction over the Facilities.
  - 3.5.2 If the Facilities have changed from the installation described in the Customer-Generator's application or this Agreement, the Customer-Generator shall submit (within 30days) an Application Change Form, (Attachment D) which is supplied by the District.
  - 3.5.3 The District provides a fully executed copy of this Agreement to the Customer-Generator.
  - 3.5.4 The District inspects the disconnect switch to ensure that the Facilities can be isolated from the District distribution system.
  - 3.5.5 The District performs the voltage testing to ensure compatibility with the existing District distribution system.
  - 3.5.6 The District installs the meter required for net-metering.
  - 3.5.7 The customer who accepts the rebate offered by the District is responsible for providing a NEMA 3, 4 Jaw meter base on the exterior of their home, within 5 feet of the manual disconnect, and not more than 6 feet off the ground. This will meter the PV generation.
- 3.6 For a Net Metering System greater than 100 kilowatts, Customer-Generator agrees to notify the District five (5) working days prior to the initial testing. The District shall have the right to have a representative present at the initial testing of Customer-Generator's protective apparatus.
- 3.7 The District reserves the right to refuse or terminate interconnection of the Customer-Generator's Facilities if the Customer-Generator fails to meet any of the Interconnection Requirements.

#### **4. DESIGN REQUIREMENTS**

The Facilities installed and used by the Customer-Generator must meet all the applicable Safety and power quality standards established by:

- (a) The National Electrical Code (NEC)
- (b) Underwriters Laboratories Inc. (UL)
- (c) The Institute of Electrical and Electronic Engineers (IEEE)
- (d) Local Government (i.e. City of Mesquite or Clark County)
- (e) Overton Power District No. 5

The District reserves the right to refuse interconnection of the Customer-Generator's facilities if the Design Requirements are not met.

## **5. MAINTENANCE PERMITS**

Customer-Generator shall:

- 5.1 Maintain the Facilities and interconnection facilities in a safe and prudent manner and in conformance with all applicable standards, laws and regulations including but not limited to, Section 4.
- 5.2 Obtain any governmental authorizations and permits required for the construction and operation of the interconnected facilities. The Customer-Generator shall reimburse the District for any and all claims, losses and / or penalties it incurs as a result of the Customer-Generator's failure to obtain or maintain any governmental authorizations and permits required for construction and operation of the Facilities.
- 5.3 The Customer-Generator shall provide to the District a copy of all governmental authorizations and permits for the Customer-Generator Facilities.
- 5.4 The District reserves the right to refuse interconnection of the Customer-Generator facilities if Customer-Generator has not obtained proper authorizations and permits.

## **6. ACCESS TO PREMISES**

- 6.1 The District may enter the Customer-Generator's premises without prior notice to:
  - 6.1.1 Inspect, at reasonable hours, Customer-Generator's protective apparatus and to read, maintain, or test meters
  - 6.1.2 Disconnect the Facilities from the Utilities distribution system during a District power interruption or if, in the District's opinion, a hazardous condition exists with the Facilities or the interconnected facilities.
- 6.2 The District reserves the right to terminate this Agreement if the Customer-Generator refuses access to the Facilities.

## **7. INTERRUPTION OR REDUCTION OF DELIVERIES**

- 7.1 District may require Customer-Generator to interrupt or reduce deliveries of available energy:

7.1.1 When necessary in order to construct, install, maintain, repair, replace, remove, investigate or inspect any of its equipment or part of District's system; or

7.1.2 If the District determines that curtailment, interruption or reduction is necessary because of emergencies, forced outages, force majeure or non-compliance with prudent electrical practices.

7.2 Whenever possible, the District shall give the Customer-Generator reasonable notice that interruption or reduction of deliveries may be required.

7.3 Notwithstanding any other provision of this Agreement, if at any time the District determines that either (1) the Customer-Generator's Facilities or its operation, may endanger District personnel, or (2) the continued operation of the Customer-Generator's Facilities may endanger the integrity of District's electric system, the District shall have the right to disconnect the Customer-Generator's Facilities from District's system without notice to the customer. The Customer-Generator's Facilities shall remain disconnected until such time as the District is satisfied that the condition(s) referenced in this section have been corrected and the District has provided the Customer-Generator written authorization to reconnect their Facilities.

## **8. INDEMNITY AND LIABILITY**

8.1 Each Party shall indemnify, defend and hold harmless the other Party against and from any and all claims, losses, liabilities, damages, costs and/or penalties for injury or death to persons, including employees of either Party, or damage to property, including property of either Party, arising out of connection with the Facilities and any acts or failures to act by either Party.

Customer-Generator shall be solely liable for any damages, including personal injury, loss of life or property damage arising from the Facilities or any modification of the Facilities, including claims based on design, construction, location, maintenance and operation. Customer-Generator agrees that the District has no responsibility for the safety of the Facilities.

District assumes no liability hereunder for personal injury, bodily injury or property damage claimed by any person or party resulting from or arising out of the engineering, design, construction, maintenance or operation of Customer-Generator's Facilities or the making of replacements, additions or betterments to Customer-Generator's Facilities.

8.2 Notwithstanding the indemnity of Section 8.1, and except for a Party's willful misconduct or sole negligence, each Party shall be responsible for

damage to its facilities resulting from electrical disturbances or faults.

- 8.3 The provisions of this Section 8 shall not be construed to relieve any insurer of its obligations to pay any insurance claims in accordance with the provisions of any valid insurance policy.
- 8.4 Except as otherwise provided in Section 8.1, neither Party shall be liable to the other Party for consequential damages incurred by that Party.

## **9. GOVERNING AUTHORITY**

This Agreement shall be governed and construed under the laws of the State of Nevada as they may be amended or superseded from time to time. The District may amend tariffs upon Board approval, which amendments are subject to public noticing requirements.

## **10. AMENDMENTS AND ASSIGNMENTS**

- 10.1 Any amendments to this Agreement must be in writing and agreed to and signed by both Parties.
- 10.2 Customer-Generator shall not voluntarily assign or delegate this Agreement or any of its rights or duties under this Agreement without the written consent of District, which consent shall not be unreasonably withheld. Any assignment or delegation made without such written consent shall be null and void. District may assign or delegate its rights or obligations hereunder in whole or in part without the written consent if such assignment or delegation is made to affiliate, subsidiary or successor that owns or operates all or any portion of the electrical distribution system or if such assignment is required by applicable laws, rules or regulations.
- 10.3 Customer-Generator shall notify the District in writing within ten (10) calendar days if the Customer-Generator sells or otherwise transfers ownership of the Customer-Generator's Facilities.

## **11. TERMS OF AGREEMENT**

- 11.1 This Agreement shall become effective as of the last date on which the Agreement is signed, and shall continue in full force and effect until terminated by either Party providing a 30-day prior written notice to the other Party. This Agreement supersedes all previous agreements written or oral.
- 11.2 Any payment(s) due and owing shall survive termination of this Agreement.

**12. NOTICES FROM CUSTOMER-GENERATOR**

Notice from the Customer-Generator to District must contain its Customer Account No. and Meter Numbers as applicable. All notices must be in writing and shall be directed to the appropriate District at the following address:

**Overton Power District #5**  
Attn: Net Metering Administrator  
P.O. Box 395  
Overton, NV 89040-0395

**13. EXHIBITS, ATTACHMENTS AND AGREEMENTS TO TERMS**

- 13.1 Attachment A, the Customer's Net Settlement Method is incorporated into this Agreement.
- 13.2 Attachment B, Portfolio Energy Credit Assignment is incorporated into this Agreement as part hereof.
- 13.3 Attachment C, Net Metering Policy.
- 13.4 Attachment D, Application Change Form
- 13.5 Customer-Generator acknowledges that he has reviewed and agrees to the terms and conditions set forth in this Agreement. Customer-Generator declares that he has read, understands and agrees that the interconnection of the Facilities shall be established and maintained in accordance with the terms of this Agreement as well as the applicable Rate Schedules and Rules.

**14. TERMINATION**

- 14.1 The District reserves the right to terminate this Agreement upon immediate written notice if the Customer-Generator fails to meet the terms, conditions or requirements specified herein.
- 14.2 The Agreement may be terminated by mutual agreement of Applicant and the District. The District reserves the right to require the Applicant to return to the District, the full monetary value of all District Rebate monies and credits that have been issued to the applicant, before the Agreement is terminated.

14.3 Any payment(s) due and owing prior to termination of this Agreement shall survive termination of the Agreement.

**ACKNOWLEDGED AND AGREED TO  
BY:  
Overton Power District #5**

**ACKNOWLEDGED AND AGREED TO

**ATTACHMENT A  
NET METERING SETTLEMENT METHOD**

At the end of the calendar year, following the commencement of net metering agreement by both Parties, Overton Power District #5 will issue a final billing statement, in settlement of all credits and debits. The amount of the customer credits or payment will be calculated in accordance with the following formula: if (E) is greater than (P) then the customer will receive a credit or cash payment

$$\text{Customer Credit} = [(P - E) \times R]$$

Where (P) is the sum of kW hours supplied by Overton Power District #5 during the prescribed billing period.

(E) Is the sum of kW hours supplied to Overton Power District #5 by the customer during the prescribed billing period.

(R) Is the cost of power rate of energy per kWh applicable to Customer over the previous months billing cycle period.

If, in a regular monthly billing cycle, the energy supplied by Overton Power District #5 to Customer is less than the energy supplied by Customer to Overton Power District #5, Overton Power District #5 will issue to Customer a credit for the net energy supplied to Overton Power District #5. The credit shall reflect, in part, the actual usage by Customer and the actual usage supply delivered by Overton Power District #5 in the next billing cycle statement. The actual usage amount could be a negative number, because Customer's energy generation will exceed Overton Power District #5's supply of energy, but such usage will not be greater than zero (0) kWh. Customer shall receive a credit determined under Overton Power District #5's average cost of power. The credit, if any, will be carried forward to the next monthly billing statement; provided, however, at the end of the calendar year, following the commencement of net energy metering by the Parties, Overton Power District #5 will issue a cash payment on a credit to Customer account for any net energy supplied by Customer to Overton Power District #5 during that period. The buyback shall not exceed \$150.00 dollars.

**ATTACHMENT B  
PORTFOLIO ENERGY CREDIT ASSIGNMENT**

I, \_\_\_\_\_ acknowledge that by participating in the Solar Generation  
Customer Name  
Program and accepting the rebate, I am assigning all the portfolio energy credits (PECs) produced by my  
PV System to the District. If during construction, I install a system with a higher kW output than that  
specified on the original application; any incremental increase in PECs will be assigned to the District.  
My acceptance of the new incentive will assign all PECs generated by my renewable energy system  
described in this Agreement to Overton Power District #5.

I accept the solar rebate from Overton Power District No. 5 \_\_\_\_\_  
Customer Initials

I reject the solar rebate from Overton Power District No. 5 \_\_\_\_\_  
Customer Initials

## **ATTACHMENT C NET METERING**

### A. PURPOSE:

The purpose of this regulation is to establish a basis of understanding between Overton Power District No.5 and its Customers relative to net metering. This Policy is created to provide a means for Customers to offset or eliminate their annual power costs and to reduce their carbon foot print.

The District, a non-profit agency, intends to accomplish this purpose without placing additional cost on other Customers or reducing power quality.

### B. DEFINITIONS

“Applicant” means a Customer who requests a net-meter and is in the process of establishing an Interconnection Agreement.

“Average Energy Cost” means the average cost per kWh that the District paid to purchase power for the previous calendar year.

“Customer” means a Customer of the District who has applied to receive energy and capacity from the District and is connected electrically to the District’s power system with a revenue meter.

“Customer-Generator” means a Customer who owns equipment used to generate, manage and monitor electricity on their side of the meter.

“District” means Overton Power District No. 5

“Interconnection Agreement” means an agreement between a Customer-generator and the District which governs the connection of the Customer-generating facility to the electric distribution system.

“kW” means kilowatt, which represents the capacity component of power. One kW equals 1,000 watts.

“kWh” means kilowatt-hour, which represents the energy component of power. One kWh equals 1,000 watt-hours.

“Large Commercial Customer” means a commercial Customer of the District who receives delivery of energy and capacity utilizing a three phase power system.

“Net Metering” is defined as measuring the difference between the electricity supplied by the District through the electric grid to the Customer and the electricity generated by the Customer and fed back onto the electric grid.

“Policy” means the District’s Net Metering Policy

“REC” means renewable energy credit. REC’s are also known as renewable energy certificate or “green tag.” A REC is an environmental commodity that is used to represent the value of renewable energy as compared to energy generated by traditional fossil fuels.

“Renewable Generation” means any type of renewable resource that is used to generate electrical energy and capacity such as wind, solar, and geothermal generation.

“Residential Customer” means a Customer who receives delivery of energy and capacity at their place of residence.

“Small Commercial Customer” means a commercial Customer of the District who receives delivery of energy and capacity at their business, utilizing a single phase power system.

## C. RESIDENTIAL CUSTOMERS

### 1. District Rebate

If a Customer installs Customer owned generating equipment in accordance with this policy, the Customer shall be entitled to a one time financial incentive based on the number of watts of power installed. The formula for a residential Customer rebate shall be the number of watts installed, times an assumed generator efficiency of 85%, times \$0.50. The financial incentive shall appear as a credit on the Customer’s power bill and shall be paid in twelve (12) consecutive equal payments over the course of one year. No credit shall be provided in a month where the Customer’s generating facilities are inoperable. The rebate shall not exceed \$2,500 for residential Customers.

### 2. Other Rebates

The Customer may be entitled to other rebates including federal and state rebates. The Customer is responsible to seek out, apply for, and collect such rebates.

### 3. Excess Energy

The energy (kWh) generated each month in excess of the Customer’s usage will be credited to the Customer’s account at the District’s average energy cost (per kWh) the following month. Accounts shall be reconciled and zeroed at the end of each calendar year. If the electricity generated by the Customer during a calendar year exceeds the amount of electricity supplied by the District, the Customer shall be compensated at the District’s average energy cost (per kWh) for the year. The buyback shall not exceed one hundred and fifty (\$150) dollars.

4. Generator Size

The sum total of installed generation for residential Customers shall be limited to a maximum of 10 kW.

Customer generation exceeding 10 kW is permitted only by special contract with the District.

5. Examples

a. Rebate Example

If a residential Customer installs 3,000 watts of Customer generation the District Rebate would be calculated by multiplying 3,000 watts by 85% and by \$0.50. The rebate would be \$1,275.

$$3,000 \text{ watts} \times 0.85 \times \$0.50 = \$1,275$$

b. Excess Energy Buyback Example

If a Customer generator has generated 1,500 kWh of excess energy during the calendar year and the Customer has an average usage of 1,500 kWh per month the excess energy would be purchased by the District. If the District's Average Energy Cost is \$0.05, the excess energy buyback would be calculated by multiplying 1,500 kWh by \$0.05. The buyback would be \$75.

$$1,500 \text{ kWh} \times \$0.05 = \$75$$

**D. SMALL COMMERCIAL CUSTOMERS**

1. District Rebate

If a small commercial Customer installs customer owned generating equipment in accordance with this policy, the Customer shall be entitled to a one time financial incentive based on the number of watts of power installed. The formula for a small commercial Customer rebate shall be number of watts installed, times the assumed generating system efficiency rating of 85%, times \$0.50. The financial incentive shall appear as a credit on the Customer's power bill and shall be paid in twelve (12) consecutive equal payments over the course of one year. No credit shall be provided in a month where the Customer's generating facilities are inoperable. The rebate shall not exceed \$2,500 for small commercial Customers.

2. Other Rebates

The Customer may be entitled to other rebates including federal and state rebates. The Customer is responsible to seek out, apply for, and collect such rebates.

3. Excess Energy

The energy (kWh) generated each month in excess of the Customer's usage will be credited to the Customer's account the following month. Accounts shall be reconciled and zeroed at the end of each calendar year. If the electricity generated by the Customer during a calendar year exceeds the amount of electricity supplied by the District, the Customer will not be compensated for the energy produced during the year.

4. Generator Size

The sum total of installed generation for small commercial Customers shall be limited to a maximum of 10 kW.

Customer generation exceeding 10 kW is permitted only by special contract with the District.

5. Example

If a small commercial Customer installs 5,000 watts of Customer generation the rebate would be calculated by multiplying 5,000 watts by 85% by \$0.50. The District's Rebate would be \$2,125.

$$5,000 \text{ watts} \times 0.85 \times \$0.50 = \$2,125$$

**E. LARGE COMMERCIAL CUSTOMERS**

1. District Rebate

If a Customer installs Customer owned generating equipment in accordance with this policy, the Customer shall be entitled to a one time financial incentive based on the number of watts of power installed. The formula for a large commercial Customer rebate shall be the number of watts installed, times the assumed generating system efficiency of 85%, times \$0.50. The financial incentive shall appear as a credit on the Customer's power bill and shall be paid in twelve (12) consecutive equal payments over the course of one year. No credit shall be provided in a month where the Customer's generating facilities are inoperable. The rebate shall not exceed \$5,000 for large commercial Customers.

2. Other Rebates

The Customer may be entitled to other rebates including federal and state rebates. The Customer is responsible to seek out, apply for, and collect such rebates.

3. Excess Energy

The energy (kWh) generated each month in excess of Customer's usage will be credited to the Customer's account the following month. Accounts shall be reconciled and zeroed at the end of each calendar year. If the electricity generated by the Customer during a calendar year exceeds the amount of electricity supplied by the District, the Customer will not be compensated for excess energy produced during the year.

4. Generator Size

The sum total of installed generation for commercial Customers shall be limited to a maximum of 25 kW.

Customer generation exceeding 25 kW is permitted only by special contract with the District.

5. Example

If a large commercial Customer installs 10,000 watts of Customer generation the rebate would be calculated by multiplying 10,000 watts by 85% by \$0.50. The District's Rebate would be \$4,250.

$$10,000 \text{ watts} \times 0.85 \times \$0.50 = \$4,250$$

**F. CONDITIONS OF ELIGIBILITY**

1. Applicant must be a Customer of the District and must maintain an active account with the District.
2. Applicant must execute an Interconnection Agreement for Net Metering which specifies the terms and conditions of the net metering program.
3. Applicant may install generating capacity equal to their highest monthly usage but the Applicant shall not exceed the sizing guidelines specified herein.
4. Applicant shall operate the generator in parallel with the District's electric distribution system.
5. Customer must purchase commercially available equipment and provide a manual disconnect of the renewable generation within three feet of the meter.
6. The District will accept up to a total of 5,000 kW of renewable generation on its system. Once this maximum level is achieved, the District reserves the right to refuse additional applications.

**G. SIZING GUIDELINES**

1. The sum total of all Customer generation shall be sized to meet the Customer's annual energy requirements.
2. The sum total of all Customer generation shall not exceed the service entrance capacity.
3. The sum total for all residential Customer generation shall be limited to 10 kW.
4. The sum total of all small commercial Customer generation shall not exceed 10 kW.
5. The sum total for large commercial Customer generation shall be limited to 25 kW.
6. Customer generation exceeding 25 kW is permitted only by special contract with the District.

## H. CONDITIONS OF INSTALLATION AND OPERATION

1. The cost, design, construction, operation and maintenance of the generator and associated facilities shall be the responsibility of the Applicant. Applicant shall insure that the design, construction and operation of the installation complies with all applicable safety and power standards of the National Electric Code (NEC), National Electric Safety Code (NECS), Underwriters Laboratories (UL), and the Institute of Electrical and Electronic Engineers (IEEE). The applicant is responsible to obtain the proper permits and have the Renewable Generation inspected by the appropriate County or City governments. The District will verify that the Renewable Generation has been installed and is operable.
2. Applicant agrees to provide the District access to all facilities, properties, and equipment as may be necessary to enable the District to operate and maintain its respective facilities, equipment and property for purposes in connection with performing its rights and obligations under this Agreement and operating its electric system. The District shall be allowed to perform a verification of the applicant's installation prior to interconnection to the District's system and to perform periodic verification of applicant's installation after interconnection to the District's system for purposes of reviewing compliance with paragraph 1 above. Upon interconnecting with the District the applicant shall become a Customer-generator. The District reserves the right to disconnect Customer-generator for purposes of protecting its employees, property or the reliability of the electric distribution system.
3. The Customer-generator shall be solely liable for any damages, including personal injury, loss of life or property damage associated with the installation, operation and/or any modification of the installation, including claims based on its design, construction, location, maintenance and operation. Customer-generator agrees that the District has no responsibility for the safety of the installation and will fully indemnify the District from any loss, including its costs and attorneys fees, arising from any claim against the District based upon or arising out of this Agreement or the installation and/or operation of said generation.
4. The District assumes no liability for personal injury, bodily injury or property damage claimed by any person or party resulting from or arising out of (1) the engineering, design, construction, maintenance, or operation of Customer-generator's installation, or (2) the making of replacements, additions, or betterments to Customer-generator's installation. Customer-generator shall indemnify the District against any and all liability or loss arising out of this Agreement or the installation and/or operation of said generation.
5. The Agreement shall not be assigned by either Party without written consent of the other Party except that the District may assign or delegate its rights and obligations under the Agreement, in whole or in part without written consent, if such assignment is required by applicable laws or applicable regulations. If such assignment is made, the District shall notify the Customer-generator of the assignment.

6. The term of the Agreement will be effective from the date the District and the Applicant execute the Agreement and will continue thereafter until termination of the Agreement in accordance with the following: (a) At any time the Renewable Generation fails to remain in compliance with the requirements contained in section 3 above, the District may immediately terminate the Agreement, revoking Customer-generator's right to interconnect the Renewable Generation to District's electric distribution system and may take such steps as are necessary to physically disconnect the installation, (b) Applicant may request termination of the Agreement by written notice to the District. The Agreement may be terminated by mutual agreement of Applicant and the District. The District reserves the right to require the Applicant to return to the District, the full monetary value of all District Rebate monies and credits that have been issued to the applicant, before the Agreement is terminated, (c) Agreement will be terminated upon sale or transfer of property where Renewable Generation is installed. New owners will need to apply for and execute a new Interconnection Agreement.

7. Customer-generator hereby transfers to the District all renewable energy credits ("RECs") derived from the Applicant's ownership and operation of, or production of energy from the Customer-generator's installation and any benefits derived from the RECs. RECs are renewable energy credits, offsets, or other benefits allocated, assigned or otherwise awarded or certified to an entity by any governmental authority or as received in connection with Renewable Quotas. "Renewable Quotas" are any laws which impose an obligation on the District to meet a required percentage of its retail load requirement by purchasing or generating electricity derived from renewable energy sources. Upon receipt of any such REC's, Customer-generator shall promptly use all commercially reasonable efforts to execute all documents, including documents transferring such RECs to the District without further compensation, in order to ensure such RECs are vested in the District. The quantity of RECs transferred to the District shall be the amount of RECs attributable to Customer-generator ownership and operation of, and all energy produced at, the Customer-generator installation.

8. This Policy is subject to periodic review and modification by the District's Board of Directors.
